

## PERSONAL SUMMARY

An economics Ph.D. student with expertise in microeconomics and economics of crime. Her research examines the degree to which changes in crime rates in the US, England and Wales, can be explained by business cycles, using a panel data analysis. Teacher in various Finance and Economic modules. Also, she is part of the leading economic team in an externally funded project that includes the Police Knowledge Fund investigating cybercrimes. She is the Research Assistant in the newly formed Centre for Crime, Justice and Policing at the University of Birmingham, while being the Research Consultant at the Warwickshire Police and West Mercia Police, in an effort to help them understand cybercrimes.

Easy going by nature and strong team player; always willing to take initiatives. Presently seeking to expand her knowledge and skills, by achieving a job in Consulting.
